Incedo Operations Transformation Solution

Incedo's operations transformation practice provides a holistic solution, enabling firms to drive efficiencies, improve margins and customer satisfaction. It delivers key insights on the current processes through thorough diagnosis, identifies the improvement opportunities and implements the changes with the help of cutting edge technology levers.

Diagnostics

Provides key insights / root causes for key pain areas of the organization; followed by recommendations with short and long term roadmap.

Automation / Digital Transformation

Implement the transformational changes using various technologies including IT development, RPA, digital transformation, data analytics etc.

Business process management

Manage the transformed operations and drive continuous improvement year on year.

We embark on the improvement journey within a couple of months:

We deploy a cross functional team comprising of domain experts, data analysts, technology experts and design professionals to assess end to end process and come up with:

- A diagnostic report of the operations processes detailing out non-value adds, automation opportunities and improvement areas
- 2 speed implementation roadmap for immediate solutions to bring in financial impact and long term sustainable growth
- Improved business margins in the first year of implementation
- Scope for modernising the legacy systems

Impact: Our Operations Transformation will help you gain competitive edge against the peer firms

- 1 Reduction in operations cost by up to 25%
- 2 Up to 30% improvement in NPS scores
- 3 Omnichannel experience – customization options
- 4 Outcome based KPIs - identification, design, tracking and reporting
- 5 Improved client reporting
